Getting Started...

This part of Instant Internet Empires is very important...so listen carefully!

Step 1:

In order to read the e-books and watch the videos, you're going to need three free programs. Most people already have these programs on their computers...but if you don't have them don't worry. **They're free!**

Program #1:

WinZip. WinZip allows you to download files that are in .zip format.

Almost everyone who has ever downloaded anything has downloaded a .zip file at one time or another.

If you don't have WinZip (or any other unzipping utility) you can get it free here: <http://www.winzip.com>. Be sure to **download the free evaluation version.**

Program #2:

Latest Version of Windows Media Player:

All of your videos are in .wmv format which requires some type of **Windows Media Player** on your computer.

I think you'll get the best results from the free Windows Media Player available from Microsoft.

You can sign-up for it and download it at Microsoft's web site:

<http://www.microsoft.com/windows/windowsmedia/en/download/default.asp>

Most likely, you already have a version of Windows Media Player on your computer. Even if you already have one, I recommend that you get the newest version from the link above.

It simply works better.

Please be sure to follow the setup instructions that Microsoft gives you. They are very easy and you'll be up and running in a snap.

(note: if your computer doesn't support Windows Media Player, you can use Real Player located at <http://www.realplayer.com>) Just get the free demo version.

Program # 3

Adobe Acrobat Reader

Just about everybody has this program already installed on their computers...but if you don't have it don't worry! It's free here:

<http://www.adobe.com/products/acrobat/readstep.html>

Step 2:

Only after you have downloaded these three programs should you proceed.

Once you've downloaded and installed WinZip and Windows Media Player, it's time to download your videos.

You need to watch your videos FIRST ...and only then should you download the rest of your programs.

Here's why:

When you're downloading your web sites, you'll most likely have questions such as, "How do I edit my web sites so they display my contact information?", "How do I set up my ordering system?", and "How do I publish my web pages to the Internet?".

Your videos will answer all of these questions and show you how to get set up as quickly and easily as possible...without any hassles!

So, unless you're an experienced web master and computer user, please go to the video section and download them before doing anything else.

[Click here for the video section now.](#)

Video Downloads ...

Did you get your Windows Media Player yet?

You need one in order to watch the videos. If you don't have it yet, [click here to get it now.](#)

Ok, now let's get started!

Video Step 1:

The first thing you need to do is create a folder on your computer and call it "Videos".

Be sure to download all of your videos to this folder so you'll know right where they are.

And remember, you have unlimited reprint and re-sale rights to these videos!

Video Step 2:

Make sure you're connected to the Internet.

Now it's time to download the videos and watch them! There is **a lot of information** covered in these videos...so it's OK if you feel a bit over-loaded at first. Just remember, you can always watch them again if you forget something or need clarification.

The best thing to do is download and watch these videos in the order that they are listed here.

Don't just download them all at once and then watch them at random! It will only lead to confusion.

Also, these video files are pretty big (another reason to download and **watch them one at a time...in order**) so I've put them in compressed .zip files.

So, after you download them, use WinZip (remember getting that earlier?) to extract, or "unzip" them.

Web Site Downloads...

Web Site And Product Downloads

Please make a folder for EACH business on your computer...just like I showed you in the videos.

Then, download the web site and products for that business into the respective folder.

This will help you immensely when it's time to edit your web sites and publish them to the internet.

Also, there is a text file for each business called READ_ME.txt

PLEASE read this file! It will help you get set up quickly!

Business #1: Building Wealth Audio Seminar and Web Site

Audio Files

You're going to need RealPlayer to listen to these files. You probably already have it...but if you don't, you can [get the free version here.](#)

You can listen to these files "live" from the Internet, or you can save them to your computer and listen later.

The sound quality will most likely be better if you save them to your computer.

[Click Here to download the audio files.](#)

Resources I use every day...

Dear Friend,

In this section you'll find marketing resources that I use each and every day.

They work for me personally in promoting both InstantInternetEmpires.com and my other web site, Hotresponders.com

As Internet marketers, we can never stop learning. Our marketing environment changes every day...and what worked last week might be a running joke this week.

The resources I'm sharing with you have literally helped make the difference between making a few bucks...and making over six figures in the first 12 months.

Without them, success would have been a long time coming.

Frank Kern

[Netbreakthroughs.com](#)

There are really only a handful of "gurus" out there that I listen to and take advice from regularly. One of my favorites is [Terry Dean](#).

Terry has an excellent marketing site called [Netbreakthroughs](#). I visit it at least once every three days **without fail**.

The best benefit of Terry Dean's site is that he tests different advertising systems and then posts the results in his members' area. This lets you know exactly what's working right now so you don't have to waste any money on bogus advertising opportunities.

It's really like being able to walk into Terry's office and have him sit down with you and say, "Here's what you should do...I did this yesterday and it produced this much profit, here's how much it will make you, based on what it did for me..."

It's a great site and the pro membership is about 10 times less expensive than the other guys...and worth about 10 times more. [Highly recommended!](#)

[Mining Gold On The Internet](#)

This is a great book by an excellent "guerilla internet marketer" named Shawn Casey.

Shawn makes abnoxious amounts of money using strange little techniques that you would never think of. His site has a great [free course](#) available too.

Before I read Shawn's book, I thought I knew all there was to know about Internet Marketing. I used one little technique from his book and raked in over \$3,700.00 in 6 days as a result.

Needless to say...I read the book again and again after that!

[Paperless Newsletter: How To Make \\$20,000.00 A Month With Your Own Internet Newsletter](#)

This is where I got the idea to create [Hotresponders.com](#).

With the [paperless newsletter](#), you learn how to create a membership site that brings in fully automated, recurring monthly income for you.

It's a book I never would have read if one of my customers hadn't strongly suggested it to me. (Actually they demanded that I read it!)

It's an [excellent resource](#) provided by Terry Dean, who is one of the best there is.

And the fact that you're reading this right now is proof positive that the strategies in the [Paperless Newsletter](#) work :-)

[InstantSalesLetters.com](#)

One of the most difficult parts of putting together a new site or running a new promotion is writing the sales letter for it.

Your sales letter is literally the single most important part of your marketing. It is what ultimately makes your prospects decide to do business with you...or click off into oblivion.

And I'll be the first to tell you...writing a sales letter is a huge pain in the neck!

That's where [Instant Sales Letters](#) comes in. It's a template system that just about let's you "fill in the blanks" and crank out a winning sales letter in minutes...instead of weeks.

I use it whenever I'm writing a new follow up letter, launching a new web site, or writing an ezine ad. Frankly, I would be lost without it.

[Highly recommended!](#)

[InstantInternetProfits.com](#)

This course is what gave me the idea for Instant Internet Empires

And Instant Internet Empires brought me over \$18,000.00 in the first six weeks!

So, if you want to learn all about how to create fully automated businesses that make you money even if you're at the beach having a Corona in the sand, then you should definitely check out [InstantInternetProfits.com](#).

Killer Mini Sites

The first web site for InstantInternetEmpires.com didn't really sell all that well.

But I knew that the product was something that everybody would want...so why wasn't it selling?

Turns out I designed the site all wrong! Terry Dean recommended [Killer Mini Sites](#) to me in a newsletter. I bought it, I read it, and I did what it said.

To make a long story short...my site brought in over \$2,500.00 five days later.

Another cool thing about [Killer Mini Sites](#) is that you can re-sell the book and keep all of the profit. It makes for a great back end product...and you even get the rights to the web site for it! Its definitely worth [checking out](#).
